

Hygiene Solutions
Established 1814

PPE & Hygiene Solutions

PRODUCT SUMMARY

www.smithbrosuk.com

Established in 1814, Smith Bros is now one of the UK's leading independent electrical wholesale distributors providing electrical maintenance and installation equipment along with low carbon renewable energy funded solutions nationally to clients from the local authority, education and NHS sectors.

With a purpose built modern centralised storage and distribution centre with over 3,000 pallet spaces Smith Bros can meet the requirements of both small and large businesses nationally.

We are currently supplying PPE to local authorities, the NHS and other agencies across the UK. This endeavour will continue as we seek to improve supply chain logistics and stock levels for equipment that is critically required. We are proud to have been a small part in helping the NHS save lives.

- In parallel to our NHS work we are looking to the future. The Government has been clear that coming out of social isolation and getting back to normal could take many months. Re-balancing our economy, a good deal longer. So, preparing businesses across the UK for when they 're-open their doors' is our next aim, priority.
- In order to get prepared we have launched several Commercial Hygiene Solutions to complement our PPE range. This equipment is targeted at supporting and protecting business against the Corvid-19 virus for both customers and staff and, in the longer term, providing a more hygienic business environment for the future. For example, it seems clear that everyone will feel more comfortable with a greater use of sanitisers on entry and exit and in the deployment of cough and sneeze guards. We feel it's clear that this pandemic will bring a new era of greater hygiene consciousness and the demand for safer workplaces. We aim to make businesses prepared for the new hygiene era.
- However, recognising that many businesses will struggle financially to get started again, let alone invest in PPE and hygiene equipment, **we will be offering financial packages** that spread the load of outright purchase at affordable levels of repayment.

Respiratory Protection
